

Does Your Body Need More Energy?

**Dr. Reynolds
Active Life Vitamins**

180 Tablets

- Calcium
- Magnesium
- Zinc
- Vitamin C
- B Vitamins and more!

- ✓ Reduce fatigue
- ✓ Improve mental clarity
- ✓ Enhance your body's energy
- ✓ Boost your immune system

WHY SHOULD YOU TAKE A SUPPLEMENT?

Studies show people who get the vitamins and minerals they need typically *have more energy and a healthier immune system* than those who do not. Sometimes even people who have healthy eating habits find it hard to get all the fruits, vegetables, and other healthy foods they need. A supplement can *help fill in the gaps*.

What are Dr. Reynolds Active Life Vitamins™?

Active Life Vitamins are designed to provide users with a sound, daily foundation of essential nutrients important to health.

How are Dr. Reynolds Active Life Vitamins™ different from regular multi-vitamins?

The tablets contains 30 important vitamins, minerals, and antioxidants in *well-absorbed* forms and are much *more complete* than many multiple vitamins.

Not only do they provide all of the vitamins found in regular multi-vitamin products, they also include *extra amounts of vitamins C, E, and B-complex vitamins, plus calcium, magnesium, and other crucial minerals and trace elements*. Dr. Reynolds Formula 1™ formula contains *all-natural forms of vitamins E and beta-carotene*, whereas most common brands contain synthetic forms that are not as effective.

Why is it important to take higher amounts of vitamins and minerals than provided in ordinary multivitamins?

There is increasing scientific evidence that antioxidants like vitamins C and E *exert their greatest health protective benefit* when taken in significantly higher amounts than the RDA (Recommended Daily Allowance) levels found in most regular multivitamins or than can be obtained through diet alone.

Similarly, generous amounts of B-vitamins are being shown to help reduce toxic build-up of homocysteine in the body. The critical actions of these nutrients for *maintaining heart health, immune function, vision protection, and brain function* are just a few examples of how important it is to regularly consume adequate amounts of essential vitamins and minerals.

Why should I pay \$30 for Dr. Reynolds Active Life Vitamins™?

While regular multivitamins may seem cheaper, they don't even come close to providing as *much nutritional benefit* as Dr. Reynolds Formula 1™. Actually, the total cost to duplicate the amounts of each nutrient supplied in Dr. Reynolds Formula 1™ is typically about 30% higher when purchasing separate products.

Why are six tablets per day needed?

It is physically impossible to deliver the amount of nutrients in Dr. Reynolds Formula 1™ in only one or two tablets per day. The formula provides about *five times more calcium* than one tablet of a regular multivitamin with minerals.

For certain especially difficult-to-absorb nutrients like folate and vitamin B12, Dr. Reynolds Formula 1™ uses the activated forms that are *easily absorbed*. Calcium bound to citric and malic acids (citrate-malate) is used in Dr. Reynolds Formula 1™ because it has been shown to have *higher absorption and effectiveness* compared to common forms such as calcium carbonate.

Difficult-to-absorb trace elements such as zinc are attached to amino acid carriers that assist their absorption and prevent interference by other nutrients, food components, or medications.

Every bottle of Dr. Reynolds Formula 1™ tablets is *tested according to official USP protocols* to be sure the tablets break down in 45 minutes or less after ingestion. The water-soluble tablet coating dissolves quickly in water or stomach acid, thus releasing active ingredients.

*Dr. Reynolds recommends taking 2 vitamins with breakfast,
2 vitamins with lunch and 2 vitamins at dinner time to
GIVE YOUR BODY THE NUTRITION IT NEEDS ALL DAY LONG!*
